

Tunable White Strip Light

○, CONCEPT

Dynamic white light is essential in environments where people remain for a long period of time, such as offices and schools. It is equally useful to create different atmospheres within the same environment such as restaurants and hospitality environments.

MECHANICAL CHARACTERISTICS

Materials	Features double sided solder points for maximum conductivity and durability. 3-circuit substrate for optimum heat dissipation, minimizing voltage drop while increasing run lengths per power feed, standardizing electrical flow over entire length of the strip for maximum product reliability.
Functionality	Allows for full dynamic control of white light blends ranging from cool to warm kelvin tones, with dimming control independent of color.
Installation	Field cuttable. Manufacturer pre-assembled to specific project lengths with factory attached end prep assemblies to be mounted or inserted into thermally protective profiles, see available options.
Protection	IP20

CERTIFICATIONS

cULus Class 2 Listed E471161 Tested in accordance with LM-79-08 Energy efficient for California installations. RoHS compliant
