Mounting Instructions

1

2

- Installer will need to find the location of where the STILO mounting plate will be installed and mark them with the mounting plate drawing to prep the location for the mounting screws. Be sure that each fixture installation location has an accessible junction box to connect the main line voltage for the fixture.
 - Once located, connect the line voltage cable of the fixture inside the junction box's line voltage of the building. **Be sure the circuit is turned off before connection.** If the fixture comes with dimming, connect the fixture's dimming cable with the circuit's dimming line. All electrical connections done with the fixture must comply with NEC and local building codes to ensure a safe and proper installation.

- Once both power line and dimming line are connected properly
 - Set up the mounting anchor based on the mounting material and prepare the four mounting holes to secure the fixture in place. Installer must properly install the fixture based on mounting surface material and comply with local building code.
 - Once the mounting holes are set, installer will secure the fixture onto the mounting surface with four mounting screws. The installer will make sure that the installation is tight and the fixture is pressed and secured on the mounting surface.

Mounting Instructions

- Once the fixture is installed correctly, the installer will adjust the lighting illumination position for specific lighting. This fixture has three different positions for aiming the fixture. Based on the picture below, there is one setting with a 4° range of tilt aiming and another one with an 8° tilt aim ability. The third option of installation is a straight 0° aiming to ensure a straight up and down. Once the installer finds their desired aiming position, the installer will secure all four screws with a 3mm Allen hex key and make sure that the fixture is secured in place.

Maintenance

This fixture was designed and manufactured for a durable, long lasting use with minimum care. To ensure the maximum lifespan of this product, we encourage our customer to provide a quality visual inspection of the fixture periodically.

If there are any irregular visible sign of issues (i.e moisture or dust) regarding the fixture please contact us as we will assist the situation at hand.ÁÁ
