# DMX Signal Connection

# Ingrade Installation Instructions

- Installers will dig out trenches or holes big enough to allow technician to perform the preparation of the ground for the PVC tube
  - Gravel in trenches is a requirement by UL for adequate drainage
  - Safety net covers below the conduit pipe to warn diggers what is below
- Position of the bottom of the PVC tube must be an accessible depth between 8.5-11.5" required for maintenance
- Insert the PVC pipe with the installation sleeve
  - The gap between the end of the LED Fixture and the bottom of the PVC pipe must have enough room to fix the power cord installed with enough slack to remove the fixture while connected
  - Tube is field cut adjustable for accessibility
- If installation requires semi-flushed installation
  - Break off outer ring of gray installation sleeve for 0.15" raise
  - Fixture will rest above the sleeve for a covered look

## INGRADE INSTALLATION

## Raised Installation Instructions

- Installers will dig out trenches or holes big enough to allow technician to perform the preparation of the ground for the PVC tube
  - Gravel in trenches is a requirement by UL for adequate drainage
  - Safety net covers below the conduit pipe to warn diggers what is below
- Position of the bottom of the Raised Tube with fixture sleeve to a depth of 12.75" for support of fixture

### For Raised Installation

- Installers will dig out trenches or holes big enough to allow technician to perform the preparation of the ground in order to install the stainless steel raised tube
- Minimum 12.75" from bottom of raised installation sleeve to ground level, installers will dig out trenches for stainless steel tube with the installation sleeve
- Stainless steel tube for raised installation is 36" total in height, this allows the tube to be field cut to create an elevated installation with a range of 1" to 23"

---

## **Maintenance**

This fixture was designed and manufactured for a durable, long lasting use with minimum care. To ensure the maximum lifespan of this product, we encourage our customers to provide a quality visual inspection of the fixture and installation accessories every six months. If there are any visible signs of issues (i.e moisture or dust) during the inspection, please clean any of the dust or moisture with a soft cloth and check to make sure that any of the fixtures are still operating normally. If there are any issues regarding the fixture please contact us as we will assist the situation at hand.

---
