Installation Accessories (Optional)

Fixture metal maintenance removal handle. Helpful one per 10 fixtures.

Part No. 1E2496

Anti-vandal torx head. Helpful one per 5 fixtures.

Part No. 1E2945

Glass suction removal tool. Helpful one per 20 fixtures.

Part No. 1E0388

In Grade J - Box Required

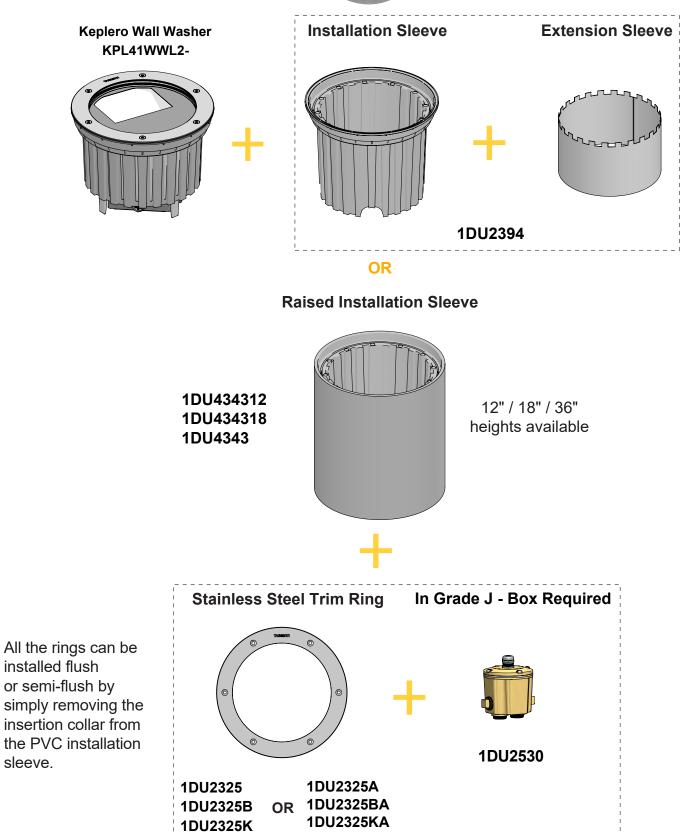

Direct burial brass ingrade j-box. Features stainless steel cover screws and strain relief for power cord, (2) 3/4" NPT bottom holes and (2) 3/4" NPT side holes. Includes (4) 3/4" to 1/2" adapters and (2) 1/2" NPT plugs (REQUIRED by NEC).

Part No. 1DU2530

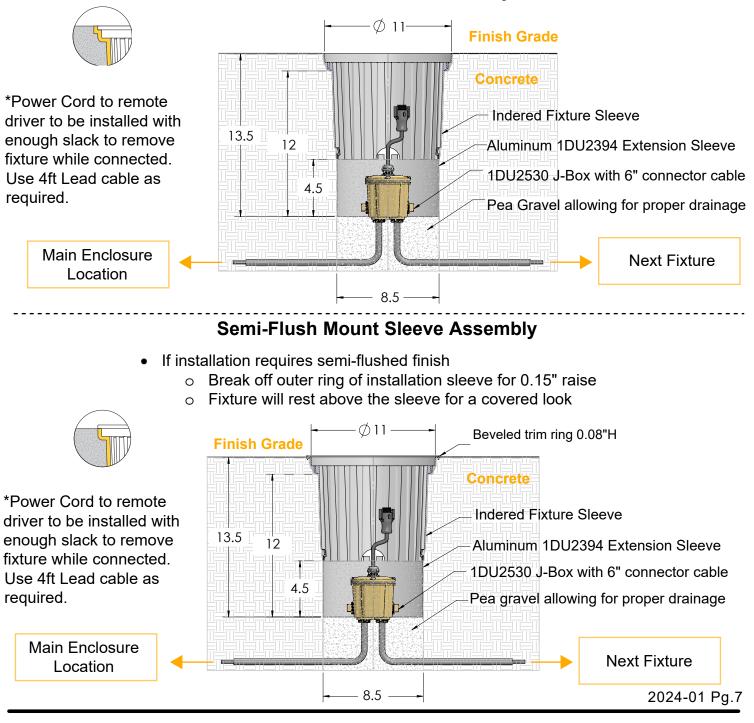

Keplero Wall Washer Installation

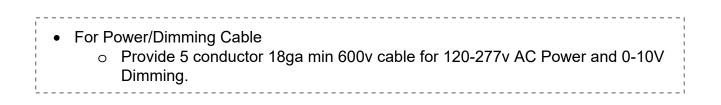

Sleeve Installation Instructions

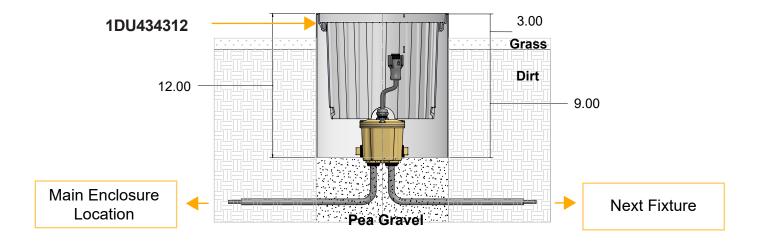

- Installers will dig out trenches to prep the aluminum extension ring and the PVC sleeve following these steps.
 - Put gravel in the trenches for the J-Box
 - Required by UL for adequate drainage
 - Safety net covers below the J-Box and the conduit pipe to warn diggers what is below
- Position of the J-Box must be at an accessible depth between 8.5-11.5" required for maintenance
- Once J-box and conduits are in position, insert the aluminum extension ring with the installation sleeve in place
 - The gap between the end of the aluminum ring and the middle of the J-Box should have enough room to fix the power cord and the power cord needs to be installed with enough slack to remove the fixture while connected

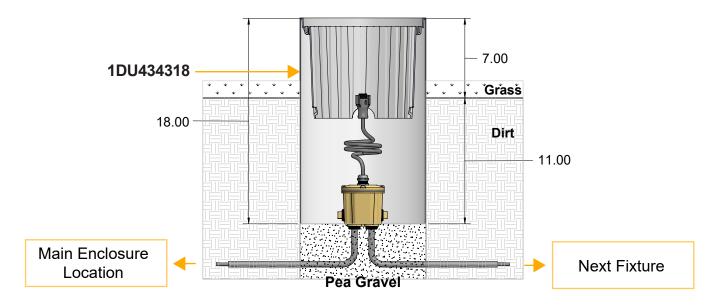

Flush Mount Sleeve Assembly

Sleeve Installation Instructions Cont.

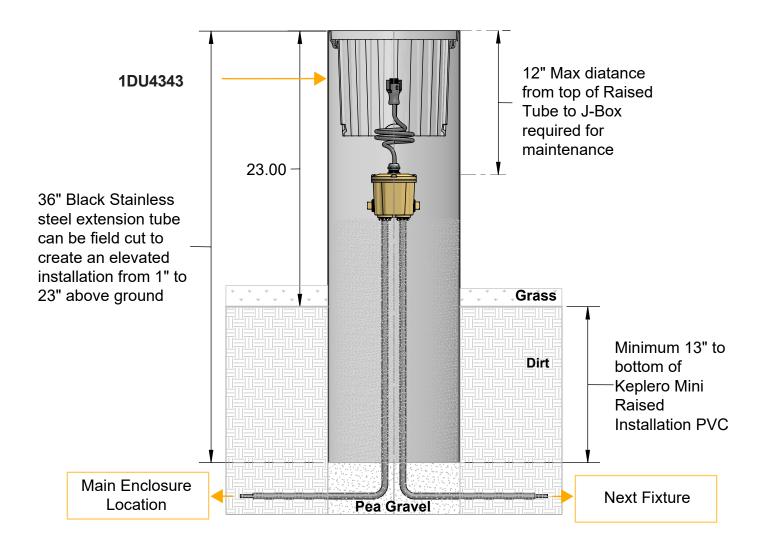

Sleeve Installation Instructions

- For Raised Installation
 - o Installers will dig out trenches to prep the PVC tube
 - Minimum 15" from bottom of raised installation sleeve to ground level Installers will dig out trenches to prep the PVC Insert the PVC pipe with the installation sleeve
 - PVC pipe for raised installation is 36" total This allows the extension PVC tube to be field cut to create an elevated installation with a range of 1" to 21"

- B Be-sure 0°Aim of Wall Wash reflector matches 0°Aim of sleeve notch to align perpendicular to wall.

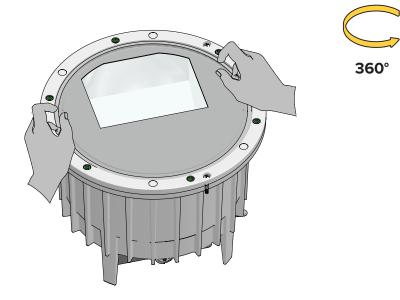

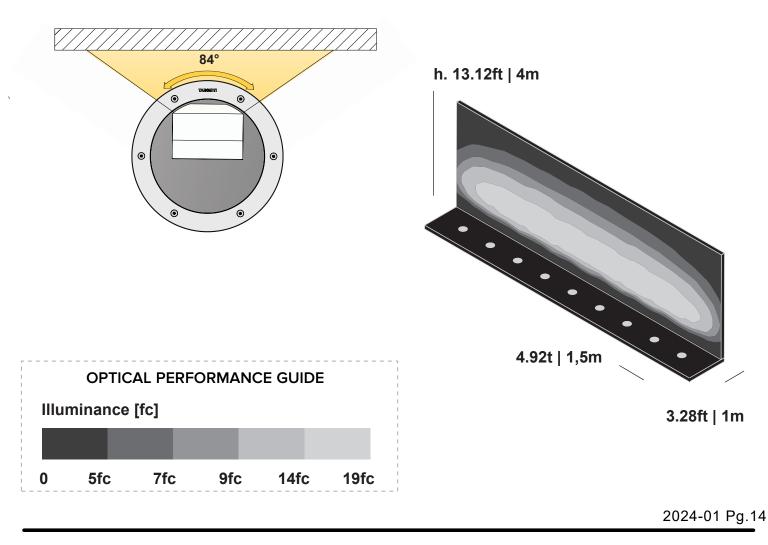

2024-01 Pg.13

level up to trim ring.

Light Beam

The Keplero Wall Washer versions provide uniform lighting on vertical surfaces. The hybrid optical system, composed of a lens, a holographic filter and specially designed reflector, not only ensure complete uniformity on vertical surfaces but light that grazes very close to the floor.

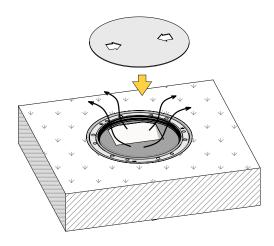

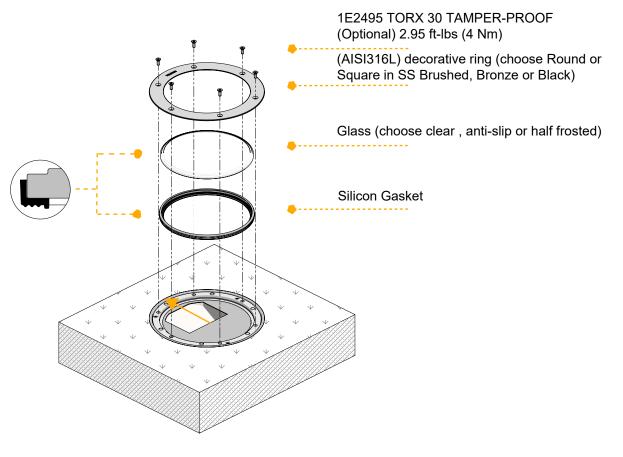

Trim Installation Instructions

Fixture comes with trim ring installed. After trim ring is removed for optics adjustment, follow these next steps to complete a successful trim ring installaton:

- Use a tamper-proof torx key (sold separately/optional but recommended) to remove the trim ring, and the glass. Access the optics holder for beam spread angligment.
- Once you set position of the optics to the desired lighting angle, <u>power on</u> fixture and <u>cover with supplied installation sleeve lid and let the fixture operate for 45</u> <u>minutesbefore attaching glass and trim ring.</u>

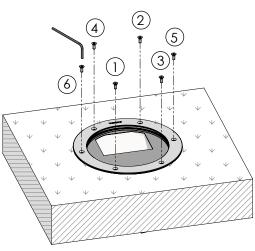

SS Trim and Glass Installation Instructions

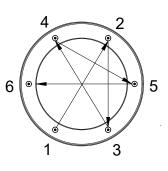

Trim Installation Instructions

- When securing the tamper-proof torx screws
 - o Apply only 2.95ft-lbs (4Nm) of torque to efficiently secure the fixture
 - Torque screws in X-box formation to provide a tight, even, and secure holding for the trim ring

1E2495 TORX 30 TAMPER-PROOF (Optional) 2.95 ft-lbs (4 Nm)

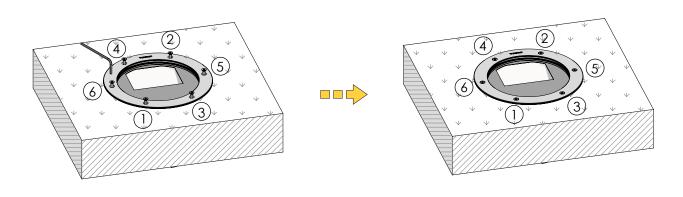

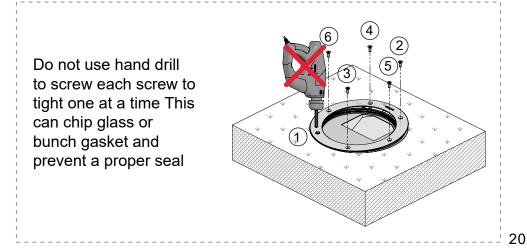

Step1:

Thread screws down in X pattern to hold trim ring flat

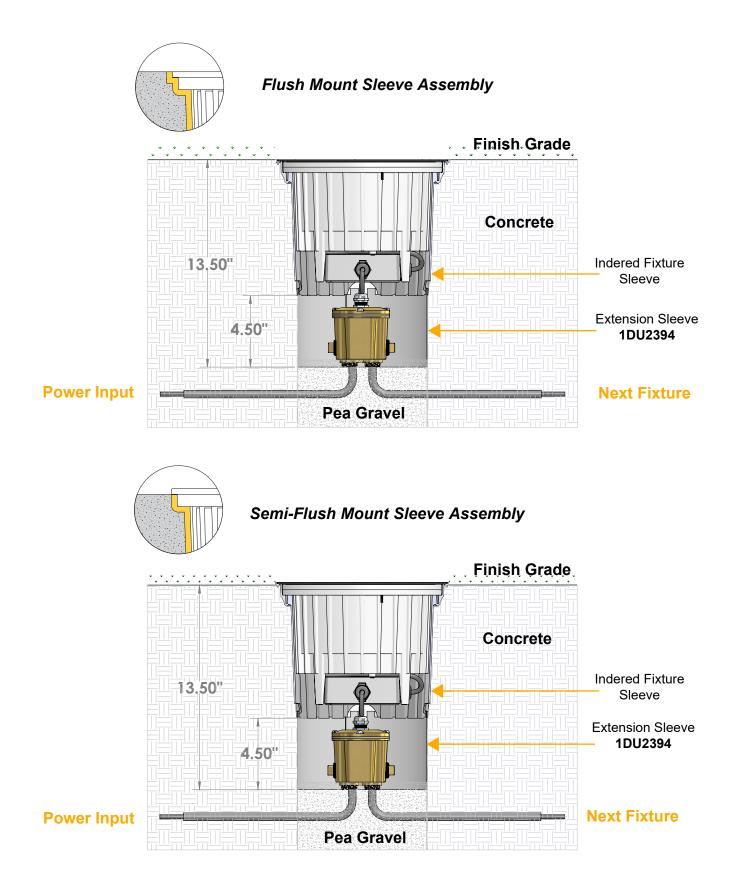

Step2: Torque screws down in X pattern to tighten and seal

Maintenance

This fixture was designed and manufactured for a durable, long lasting use with minimum care. To ensure the maximum lifespan of this product, we encourage our customer to provide a quality visual inspection of the fixture and installation accessories every six months. If there are any visible signs of issues (i.e moisture or dust) during the inspection, please clean any of the dust or moisture with a soft cloth and check to make sure that any of the fixtures are still operating normally. If there are any issues regarding the fixture please contact us as we will assist the situation at hand.
